2024_28_III_OOPS Using Java Lab

REC_2028_OOPS using Java_Week 7_MCQ

Attempt : 1

Total Mark : 15

Marks Obtained : 15

Section 1 : MCQ

1. What is the output of the following code?

```
interface X {  
    default void show() {  
        System.out.println("X's Default Method");  
    }  
}
```

```
interface Y {  
    default void show() {  
        System.out.println("Y's Default Method");  
    }  
}
```

```
class Z implements X, Y {  
    public void show() {
```

```
        System.out.println("Z's Method");
    }
}

public class Main {
    public static void main(String[] args) {
        Z obj = new Z();
        obj.show();
    }
}
```

Answer

Z's Method

Status : Correct

Marks : 1/1

2. What happens when an implementing class does not override a default method from an interface?

Answer

The default method's implementation from the interface will be used.

Status : Correct

Marks : 1/1

3. What is the output of the following code?

```
interface A {
    default void show() {
        System.out.println("A's Default Method");
    }
}
```

```
class B {
    public void show() {
        System.out.println("B's Method");
    }
}
```

```
241501183 class C extends B implements A {  
241501183 }  
241501183 public class Main {  
241501183     public static void main(String[] args) {  
241501183         C obj = new C();  
241501183         obj.show();  
241501183     }  
241501183 }  
241501183
```

Answer

B's Method

Status : Correct

Marks : 1/1

4. What is the output of the following code?

```
241501183 interface A {  
241501183     default void show() {  
241501183         System.out.println("A's Default Method");  
241501183     }  
241501183 }
```

```
241501183 interface B {  
241501183     default void show() {  
241501183         System.out.println("B's Default Method");  
241501183     }  
241501183 }
```

```
241501183 class C implements A, B {  
241501183     public void show() {  
241501183         A.super.show();  
241501183     }  
241501183 }
```

```
241501183 public class Main {  
241501183     public static void main(String[] args) {  
241501183         C obj = new C();  
241501183         obj.show();  
241501183 }
```

```
}
```

Answer

A's Default Method

Status : Correct

Marks : 1/1

5. What is the primary purpose of static methods in Java interfaces?

Answer

They allow an interface to provide helper methods without requiring an implementing class.

Status : Correct

Marks : 1/1

6. What is the output of the following code?

```
interface A {  
    static void display() {  
        System.out.println("Static method in A");  
    }  
}
```

```
class B implements A {  
    static void display() {  
        System.out.println("Static method in B");  
    }  
}
```

```
public class Main {  
    public static void main(String[] args) {  
        B.display();  
    }  
}
```

Answer

Static method in B

Status : Correct

Marks : 1/1

7. Which of the following statements is true regarding default methods in Java interfaces?

Answer

A default method can be overridden in a class implementing the interface.

Status : Correct

Marks : 1/1

8. How can a class explicitly call a default method from an interface if there is a naming conflict?

Answer

Using InterfaceName.super.methodName();

Status : Correct

Marks : 1/1

9. Consider a class implementing an interface and extending a class, both having a method with the same name. Which method gets called?

Answer

The method from the superclass

Status : Correct

Marks : 1/1

10. How do you call a static method from an interface MyInterface?

Answer

MyInterface.staticMethod();

Status : Correct

Marks : 1/1

11. Which of the following statements about Java interfaces is true?

Answer

A class can implement multiple interfaces.

Status : Correct

Marks : 1/1

12. What is the output of the following code?

```
interface MathOperations {  
    static int square(int x) {  
        return x * x;  
    }  
}  
  
public class Main {  
    public static void main(String[] args) {  
        System.out.println(MathOperations.square(5));  
    }  
}
```

Answer

25

Status : Correct

Marks : 1/1

13. If a class implements two interfaces that have the same default method, what must the class do?

Answer

The class must override the method to resolve ambiguity.

Status : Correct

Marks : 1/1

14. Can a Java interface contain both default and static methods?

Answer

Yes, an interface can have both default and static methods.

Status : Correct

Marks : 1/1

15. Which of the following is the correct way to declare an interface in Java?

Answer

```
interface Vehicle { void start();}
```

Status : Correct

Marks : 1/1
